04 – EFFECTIVENESS & LESSONS LEARNED

05 - CONCLUSIONS

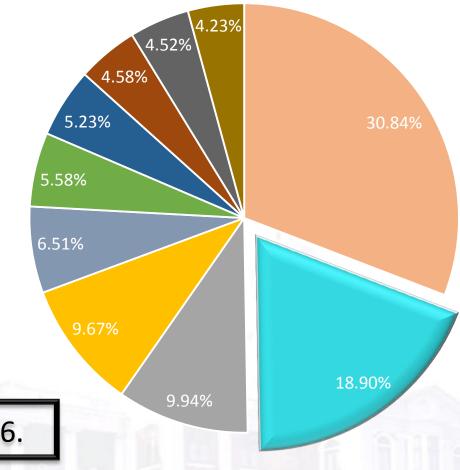

STROKE: THE OVERLOOKED KILLER

Global Health Estimates 2016: Estimated deaths (Top 10 killers)

- **■**Stroke
- Chronic obstructive pulmonary disease
- Lower respiratory infections
- Alzheimer disease and other dementias
- Trachea, bronchus, lung cancers
- Diabetes mellitus
- Road injury
- Diarrhoeal diseases
- Tuberculosis

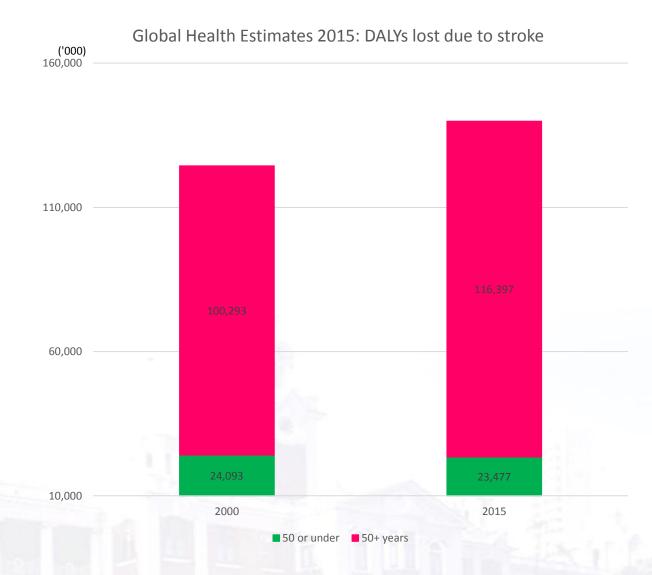

TRUE BURDEN OF STROKE

Why we care?

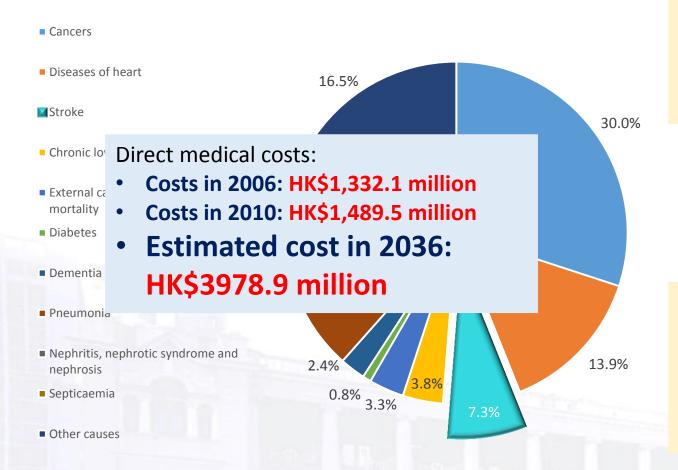

- True burden of stroke is chronic disability rather than death
- Approximately a third of stroke survivors are functionally dependent at 1 year
- 10-year survivors % (95%CI)
 - ➤ Barthel index severe disability 14.4% (11.3-18.2)
 - ➤ Barthel index Moderate disability 12.2% (9.4-15.8)
 - Frenchay Activities index inactive 49.5% (44.5-54.5)
 - > HAD's depression 35.6% (30.9-40.6)
 - > HAD's anxiety 31.4% (26.9-36.3)
 - Cognitively impaired 28.0% (22.7-34.1)

STROKE IN HONG KONG

Leading causes of death in Hong Kong (2014)

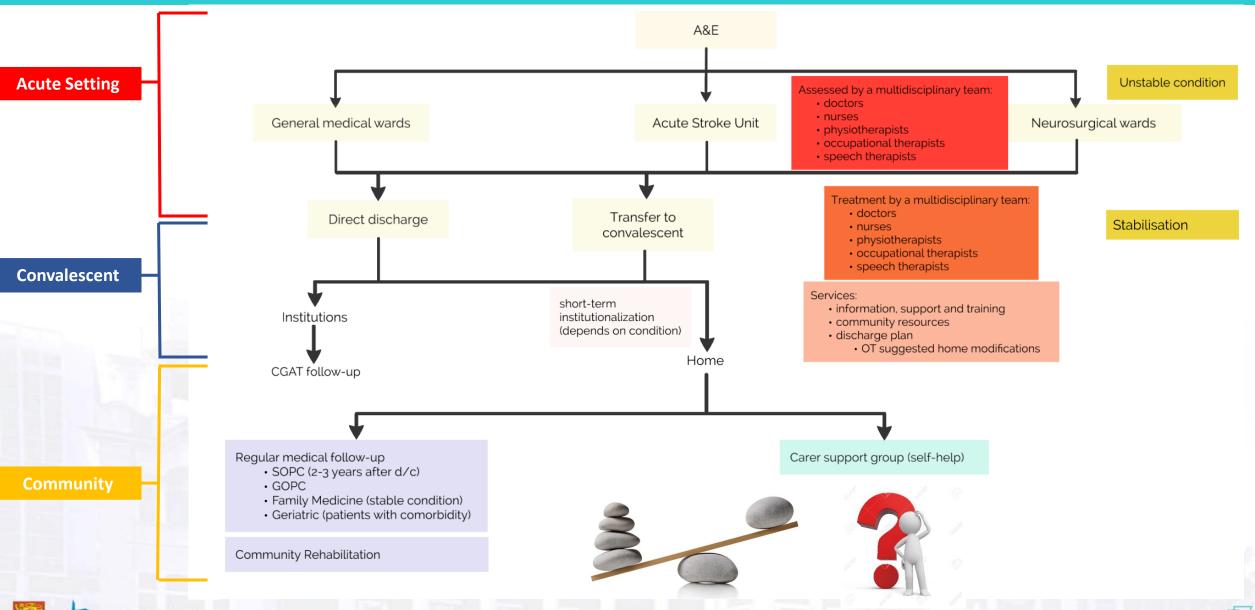

Every year, around **22,000** people who suffer form stroke discharge to home or institutional care

60 families start to take care of a stroke patient every day!

STROKE CARE CHALLENGES

Source: Informal communication with medical practitioners, 2018)

SUPPORTING COMPLEX NEEDS ACROSS THE CARE

CONTINUUM

Acute Care

Medical

Information

Financial

Family needs:

- What are treatment choices?
- Handle sudden change in job / family arrangement.
- Any consequences?Rehabilitation potential?

Transit from Hospital to Home

Medical

Practical

Psychological

Family needs:

- Shall I quit job / take leave?
- Shall we do home modification?
- Where to get walking aids and how to use it effectively?
- Shall we go for alternative?
- How I can do ADL care?

Community re-habilitation

Medical

Psycho-social

Family needs:

- What I can do more to motivate rehabilitation?
- Would it be too selfish to "take a break"?
- Am I the only one who should take care of the patient and/or my family?
- How we can cope better when feel frustrated?
- What would be our family goals?

HEALTH AND SOCIAL CARE COLLABORATION

Acute Setting to Convalescent

FAMILY ORIENTATION

We believe family resilience!

to the graphet a reason of the control of the contr

CARE MANAGEMENT

Professional led Trained volunteers partnered

OBJECTIVES

Enable a new family equilibrium

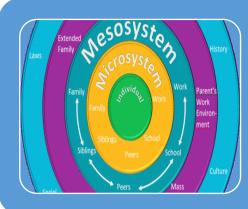

Empower a better community integration

3 Nurture a caring community

THEORETICAL BASE

System theory

- The whole is more than the sum of the parts
- Circular causality for goal achieving
- Positive feedback / communication is the key

Empowerment

- Families are able to work out solutions for new system equilibrium given appropriate opportunities
- Six attributes of empowerment

SIX ATTRIBUTES OF EMPOWERMENT

Active participation that values self & others (family)

Knowledge to problem solve (positive coping)

Self-care acceptance,
responsibility
(also being cared by families)

Informed change (feedback on rehabilitation; participatory decision-making)

Presence of client competency (preserve; restore, and transform)

Control on health & life (let go; forgive)

TWO-TIER CARE MANAGEMENT INTERVENTION

Comprehensive Assessment

Family-oriented Care Plan (FCP)

Professional led

Volunteer partnered

On Need Base

4+2

- 1. Goal setting
- 2. Relationship, care and support
- 3. Family and the caregiving context
- 4. Family conference
 - Dementia
 - Domestic Helper

I. Self care

- 2. Caregiving skills (ADL)
- 3. Communication and swallowing challenges
- 4. Speech training
- 5. Health impacts after stroke
- 6. Cognitive training
- 7. Home-based exercise
- 3. Medication management
- 9. Home safety and emergency care
- 10. Communication with health care professional
- 11. Community resources

- ✓ Close Case
- ✓ Referral to Other Services
- ✓ Peer Group

EFFECTIVENESS & LESSONS LEARNED

Inclusion & Exclusion Criteria

Effectiveness on Key Outcome Measures

Lessons Learned

INCLUSION & EXCLUSION CRITERIA

Caregiver

Inclusion

- Age 18 or above
- Cantonese-speaking
- Provides at least 10 hours (including supervising domestic helper if applicable) of care per week
- Primary family caregiver
- Experiences caregiving challenges
 - Perceived burden
 - Depressive mood
 - Family dysfunctioning
- Voluntary

Exclusion

Suffer from acute health conditions

Patient

Inclusion

- Age 50 years or above
- First ischemic or hemorrhagic stroke
- Discharged within six months
- Community-dwelling

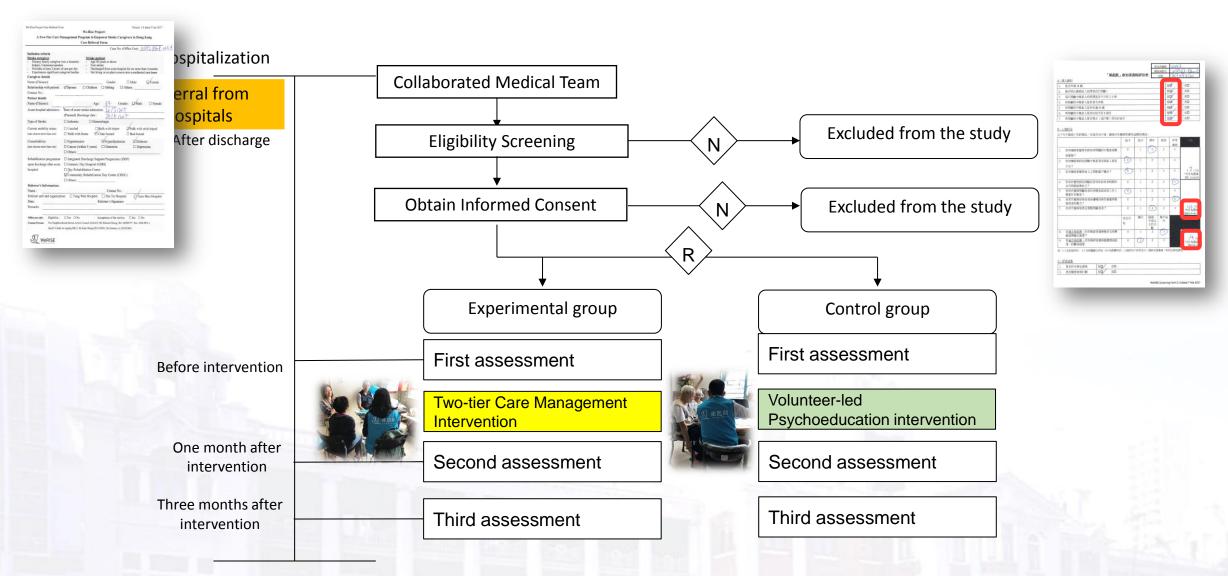

Exclusion

- Transient ischemic attach (TIA)
- Plan to move into residential care within 6 months

RESEARCH SCHEMA

PATIENTS' CHARACTERISTICS (N=85)

	Control Group (n=42)	Intervention Group (n=43)
Gender (%) Female Male	57.1 42.9	41.9 58.1
Age Range Mean (SD)	50-94 68.67 (13.60)	52-93 70.19 (11.17)
Education (%) Primary School or below Secondary School or above	57.1 42.9	61.9 38.1
Employment before stroke (%) Yes No	26.2 73.8	34.9 65.1
Living with caregiver (%) Yes No	88.1 11.9	76.7 23.3
Comorbidities Range Mean (SD) Median	0-4 1.88 (1.09) 2.00	0-6 2.41 (1.52) 2.00
Activities of daily living Range Mean (SD)	17-95 60.41 (22.55)	0-95 62.30 (27.61)
Instrumental activities of daily living Range Mean (SD)	0-12 4.66 (3.57)	0-18 5.39 (5.08)

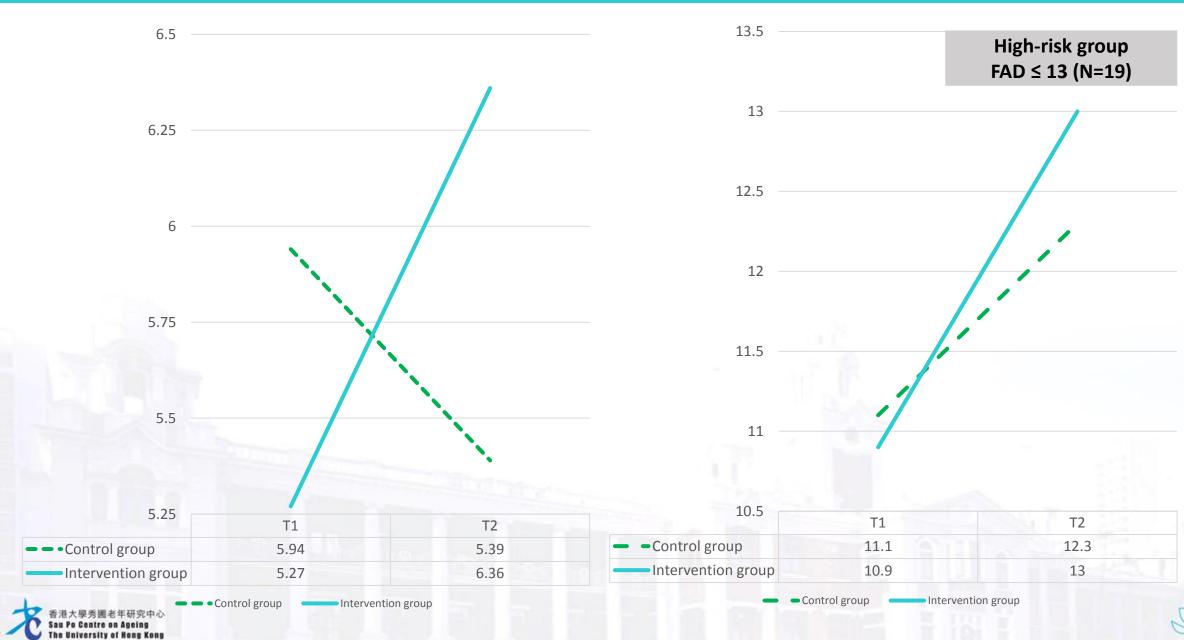

CAREGIVERS' CHARACTERISTICS (N=85)

	Control (n=42)	Intervention (n=43)
Gender (%) Female Male	69.0 31.0	74.4 25.6
Age Range Mean (SD)	25-81 55.10 (12.59)	22-82 53.07 (13.89)
Education (%) Primary School or below Secondary School or above	42.9 57.1	25.6 74.4
Employment (%) Yes No	45.2 54.8	44.2 55.8
Personal monthly Income (%) Below \$10,000 \$10,000 or above	60.0 40.0	68.3 31.7
Length of caring (month) Range Mean (SD) Median	1-114 6.39 (17.90) 2.00	1-84 5.57 (13.12) 2.50
Weekday daily time of caring (hour) Range Mean (SD)	0-18 9.30 (5.13)	1-24 8.88 (5.77)
Weekend daily time of caring (hour) Range Mean (SD)	0-42 11.39 (7.61)	0-36 10.57 (7.03)

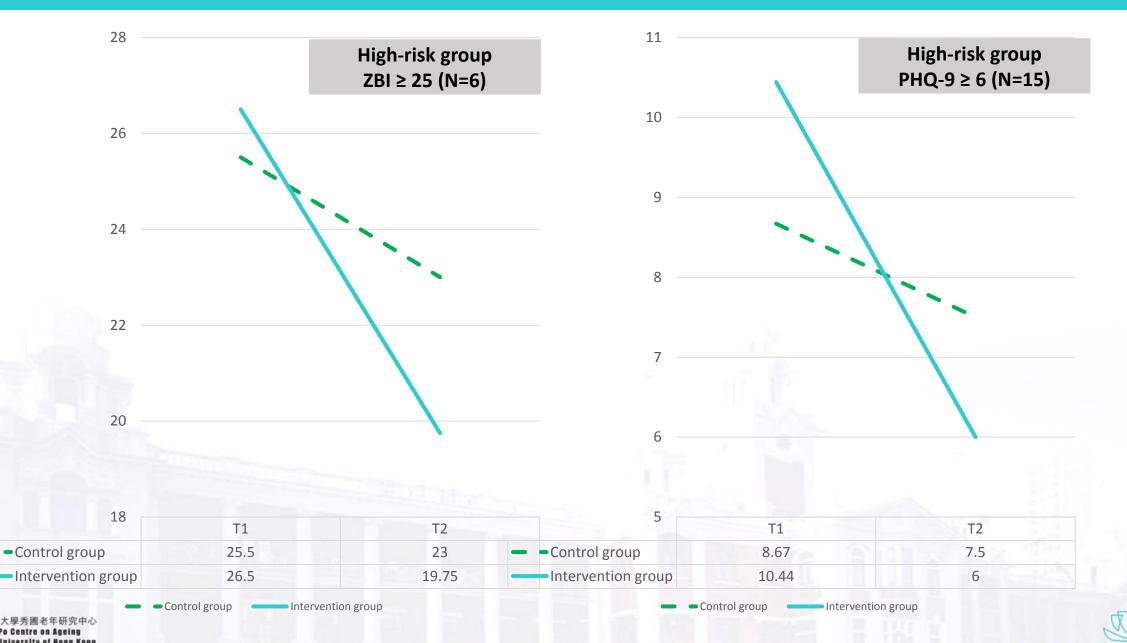

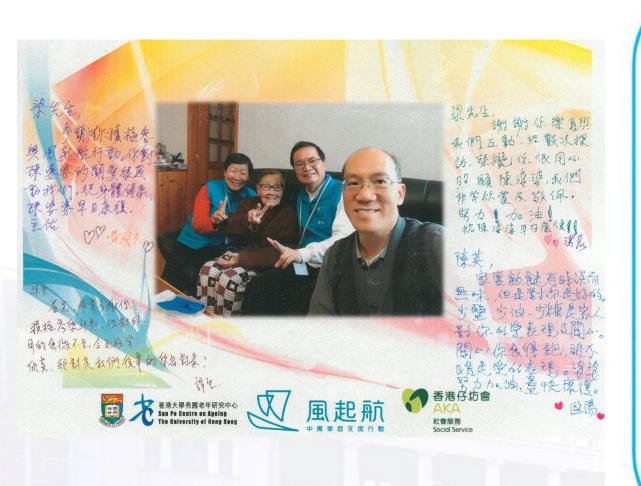

STROKE KNOWLEDGE & FAMILY FUNCTIONING

CAREGIVER BURDEN & MENTAL HEALTH

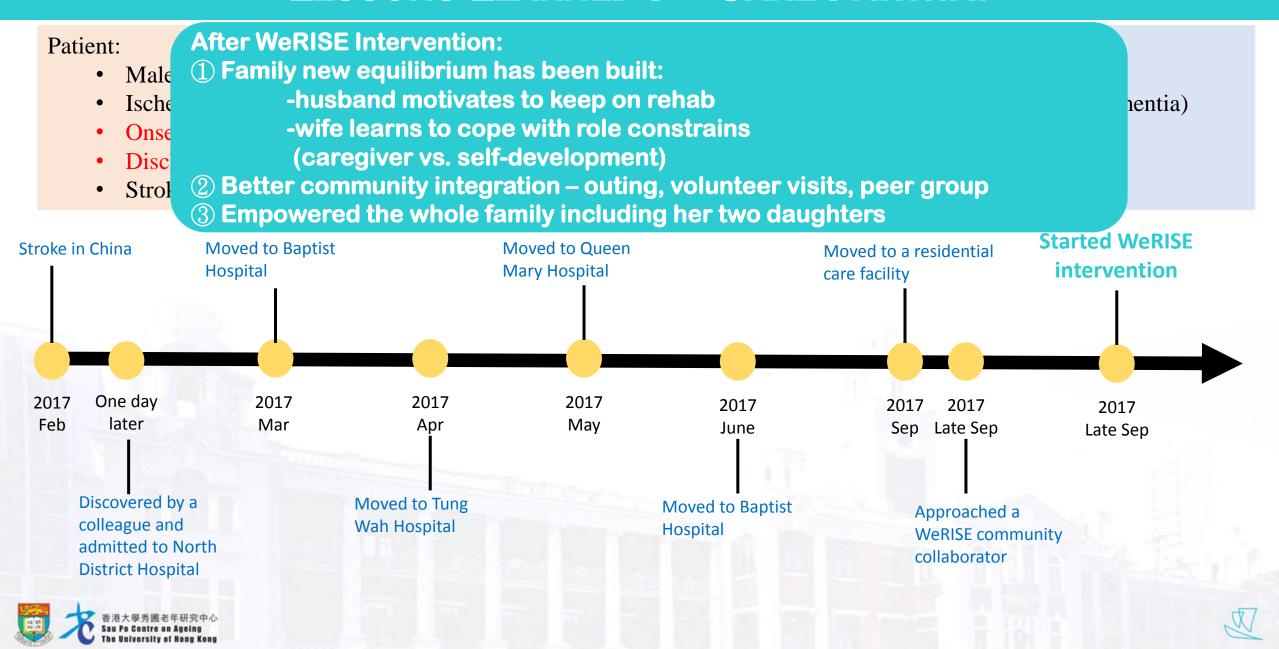

IMPACTS ON FAMILIES

風起航中副家庭支援行動 是很有意義,除佐幫助而婚妈 之外其實形覺得最大得益是家人。 因可以減低家人壓力,而透過這個 風起紙行動,可以加象認識對 中風都了解,而受到散在日常 生活當中会 照 覆 散 妈 遇! 所以我真得非常感激的 風起航這個行動. 像了三分、 **承要多附第過 我妈妈的第**工 及防爆

LESSONS LEARNED I - CARE PATHWAY

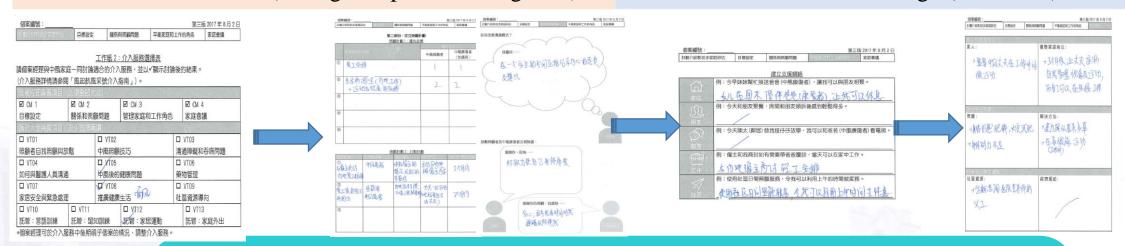

LESSONS LEARNED II — HOLISTIC "REHABILITATION"

Patient:

- Male (56 yrs)
- Hemorrhagic stroke
- Onset date: 2017 Nov
- Discharge date: 2018 Jan
- Worked in China (managerial position engineer)

Caregiver:

- Patient's wife (50 yrs)
- Was studying Master of Arts (Dance) in Taiwan, decided to defer study and take up the caregiver role
- Has a daughter (studying bachelor in Taiwan)
- Perceived burden is high (ZBI- $4 \ge 6$)

After WeRISE Intervention:

- ① Community re-integration: Back to work with continuous rehabilitation exercise & diet-cautious lifestyle; wife resumed study in Taiwan
- ② Family new equilibrium: reduced conflicts in lifestyle (exercise, diet, and work)

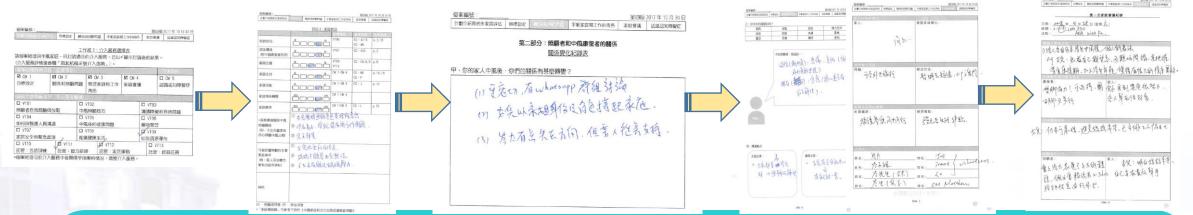

LESSONS LEARNED III — FAMILY EMPOWERMENT

Patient:

- Male (68 yrs)
- Hemorrhagic stroke
- Onset date: 2016 Nov
- Discharge date: 2017 Mar

Caregiver:

- Patient's wife (64 yrs)
- Felt stressful and wanted to join WeRISE
- Daughter thought home visits would disturb patient
- Joined WeRISE without notifying her daughter

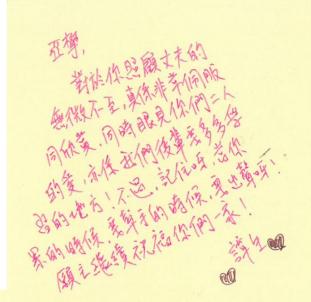

After WeRISE Intervention:

- (1) Family new equilibrium established: supportive family as a whole
- ② Better community integration: peer support, community

REFLECTIONS BY CARE MANAGERS

陳生、陳太郎地對大夫與人看到她對大夫與人看到她對大夫與人看到她對大夫與我不至,體學教育,是有到婚人,是是我的人,便是我的人,便是我们看到你们一家人的是我们看到你们一家人的是我们一家人的是我们一家人的

你太久起航的行動中,我們看到你對陳伯伯的愛與關係 你對陳伯伯的愛與關係 你我們多好的學習,與家條的合作, 不得到了女的支援,使陳伯伯特 可充分的無極。 在行動時,我們更加學習, 於自動學證底,陳伯伯昇出處後 定批 》 黃國光
