# The importance of Anti-Wandering System to Dementia

When the elderly with Dementia get lost 48-72 hours, the **dead rate will increase 30 - 40%** if no one help.

# Traditional Anti-Wandering System

- Elderly need to wear the wearable anti-wandering devices:

RFID Wristband

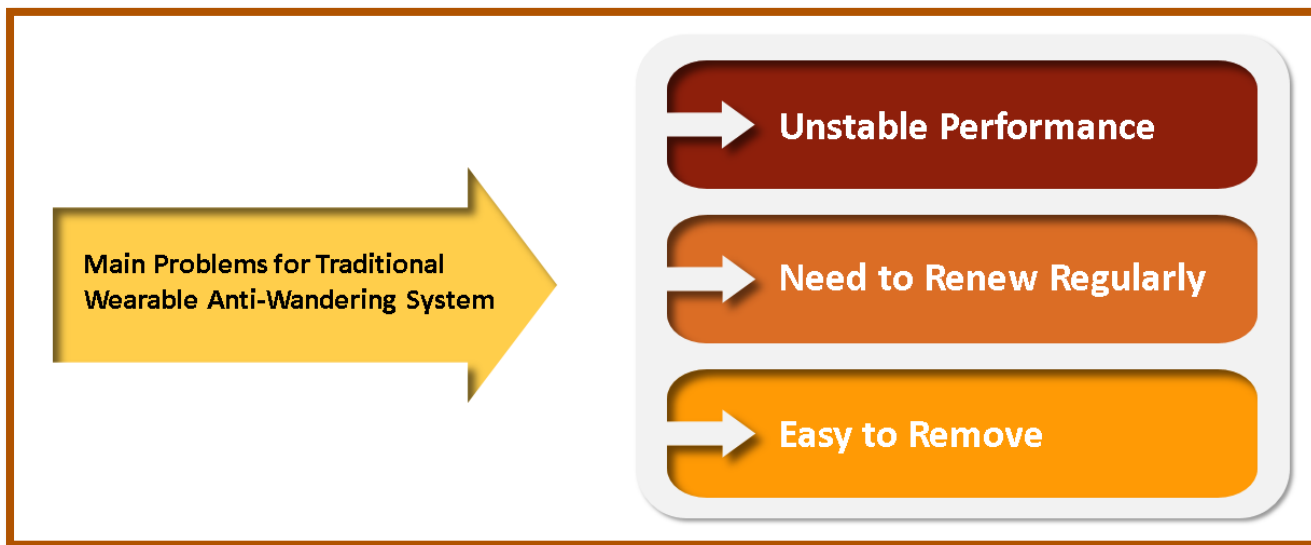

Washable RFID Tag

RFID

RFID Pin

- Problems for Traditional Wearable Anti-Wandering System:

# NEC Face Recognition Anti-Wandering System

**Face Recognition**

**Anti-Wandering System**

Step  
**1**

## User Enrollment

Still photos / live camera images of targets

+

Personal particulars & demographics

Register into database

Step  
**2**

## Face Capture

Facial images detected from photos / videos

Convert into small feature files

Smooth enrollment & matching servers for processing

Step  
**3**

## Face Matching

Compares captured faces with pre-registered photos

When a match is found, system will trigger an alert in real time

Provide nearest matching photo with a threshold index (*indicate how approximate the two faces are*)

Show related identity info via Alert Viewer Console

# NEC Face Recognition Anti-Wandering System

NEC Face Recognition Anti-Wandering System is designed for monitoring exits and preventing the elderly from wandering off a facility unguarded.

## Step 1

Enroll photos of the elderly to the Face Recognition System for **enrollment**

## Step 2

The Anti-Wandering System installed NEC Face Recognition technology on CCTV network for identifying and locating the elderly. When the system detects the elderly near a CCTV-monitored exit, the system will capture the facial image of the elderly for **matching and identification**, then **an alert** will be sent to the Nurse Station to inform staff and caregivers. The system can monitor all exits, with no blind spots to support elderly care services.

# Performance of NEC Face Recognition Technology

NEC Face Recognition Anti-Wandering System can identify people even when they are **wearing mask, glasses and hat.**

NEC Face Recognition

# Advantages of NEC Face Recognition Anti-Wandering System

## High Performance

Most Accurate and Fastest real-time facial matching

## Easy Implementation

Simply use common hardware for implementation

## Cost-effectiveness

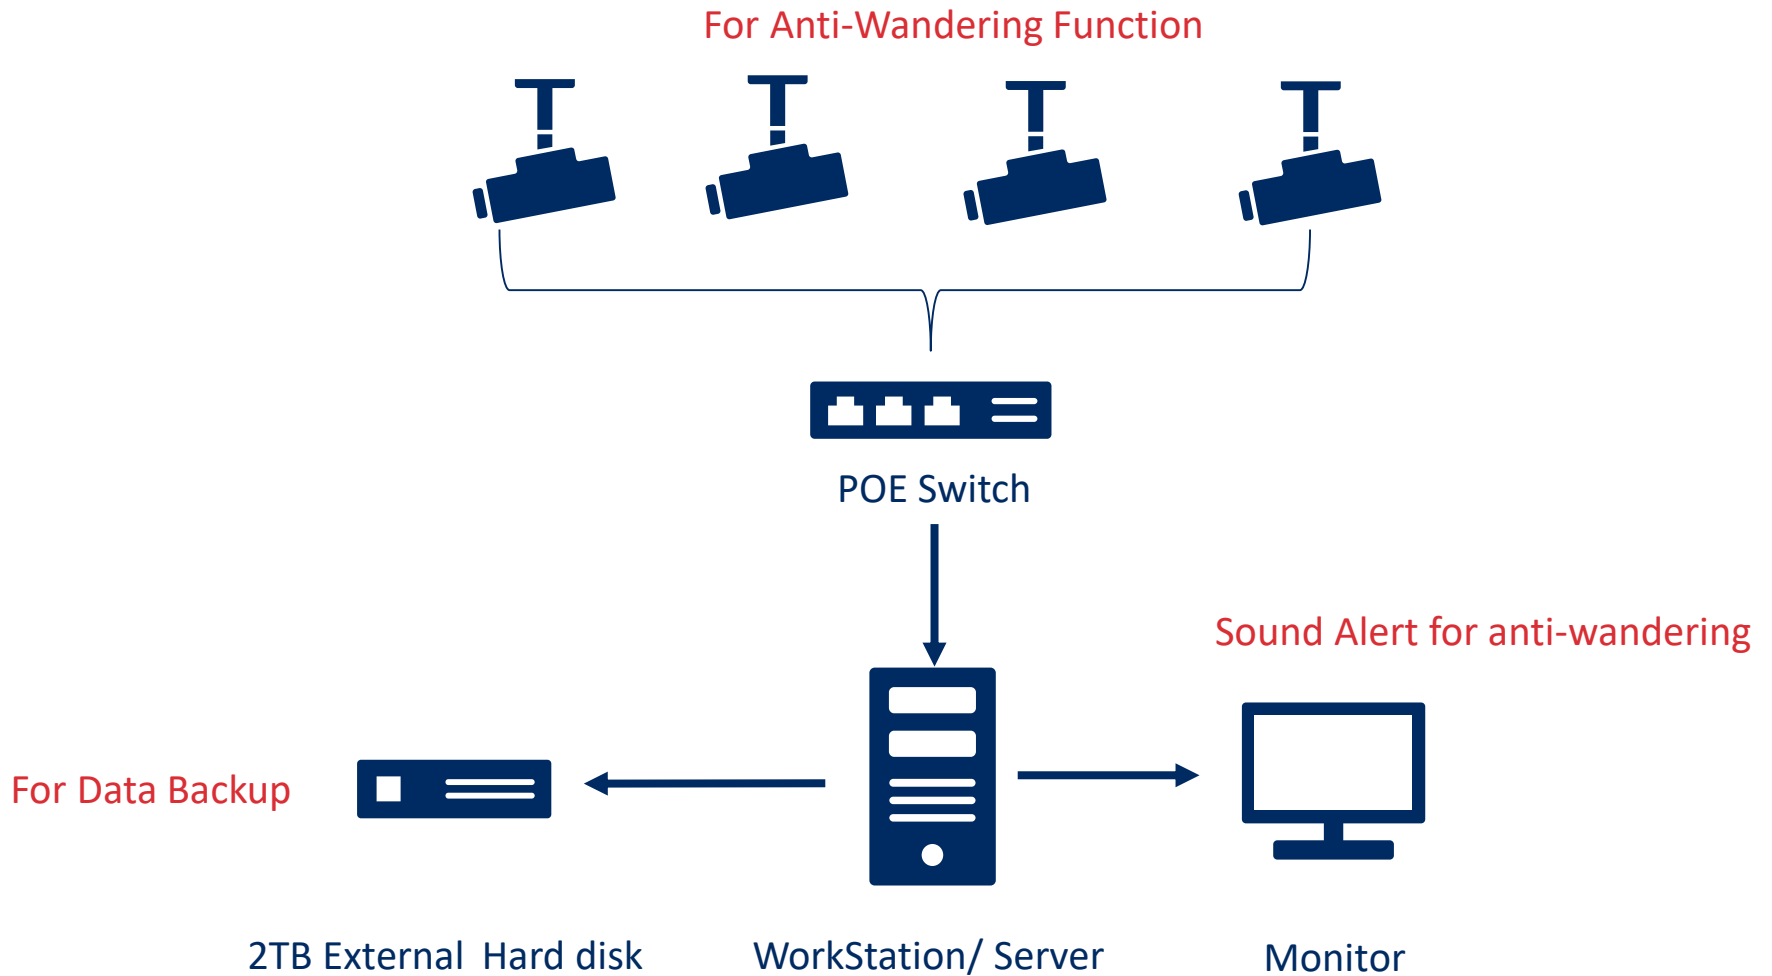

No need for replacements and less manpower needed for tracking compared to wearable anti-wandering devices

## High Flexibility

Offer One-to-One and One-to-Many matching algorithms, and allow customization for specific operational needs

# Implementation of NEC Face Recognition Anti-Wandering System

# NEC Face Recognition Anti-Wandering System + NEC Social Robot

NEC Social Robot has Face Recognition technology to identify and monitor the elderly. When the elderly near the exit, Robot will provide friendly reminders by voice in Cantonese to remind the elderly not to leave the Elderly Home.

# NEC Social Robot

with Autism**

# NEC Social Robot – Smart Technologies

## Voice Recognition:

- Voice recognition microphone
- Noise canceling microphone

## Face Recognition:

- Face recognition camera
- Camera for shooting

## Sensors:

- Human detection
- Temperature sensor
- Humidity sensor

# NEC Social Robot - Multiple functions

## Socially Connected

- Video call to family, friends or doctors
- Audio phone call
- Send messages

## Healthy Lifestyle

- Dancing with robot
- Proactive exercise reminder
- Diet improvement system

## Interactive Modalities

- Speech recognition
- Face & emotion recognition
- Touch interface
- Smart watches

## Personalized Services & Novelty

- Daily service pattern analysis
- Personalized services
- Uploading own music & books
- Ongoing new services

## Therapy Games & Quiz

- Cognitive (picture) quizzes
- Bingo games
- Calendar task planning and reminder

# NEC Social Robot - Caring for **Elderly with Dementia**

NEC Social Robot has accumulated **10 years** of application experience. Robot can support **people with dementia** to live independently, and help reduce negative behavioral and psychological symptoms.

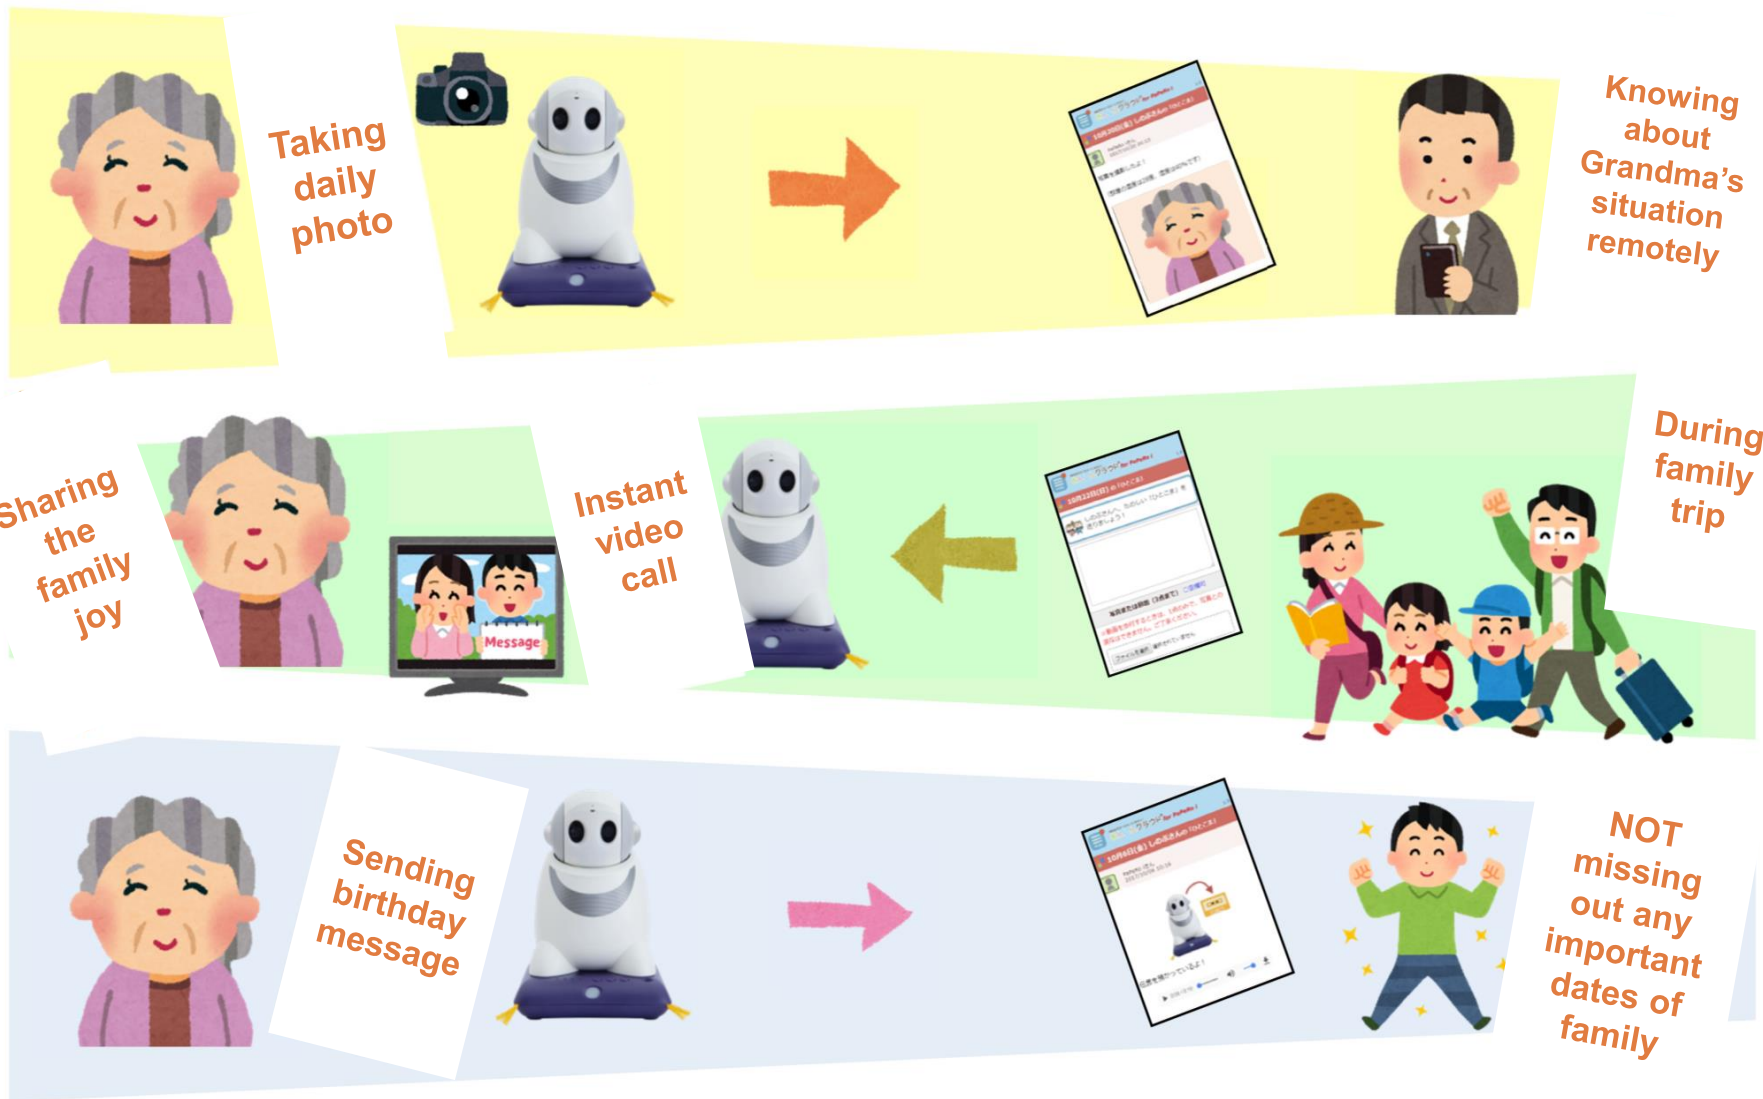

## **NEC Social Robot offers a wide range of functions for elderly with Dementia :**

- Suitable for elderly with Dementia for Home-based Personal Care
- Interactive Communication  
(including Cantonese, Mandarin & English)
- Companionship
- **Interactive Modalities**
- Real Time Reminder
- Socially Connection
- Real Time Video Call
- Healthy Lifestyle
- **Personalized Services & Novelty**
- Therapy Games & Quiz

# NEC Social Robot - Caring for **Elderly with Dementia**

## NEC Social Robot - Training Programs & Games for elderly with Dementia:

# Case Study – Trial Programme in Elderly Home (Yr2018)

**Case:** Trial Programme for using **NEC Social Robot** in one of the Elderly Home in Hong Kong

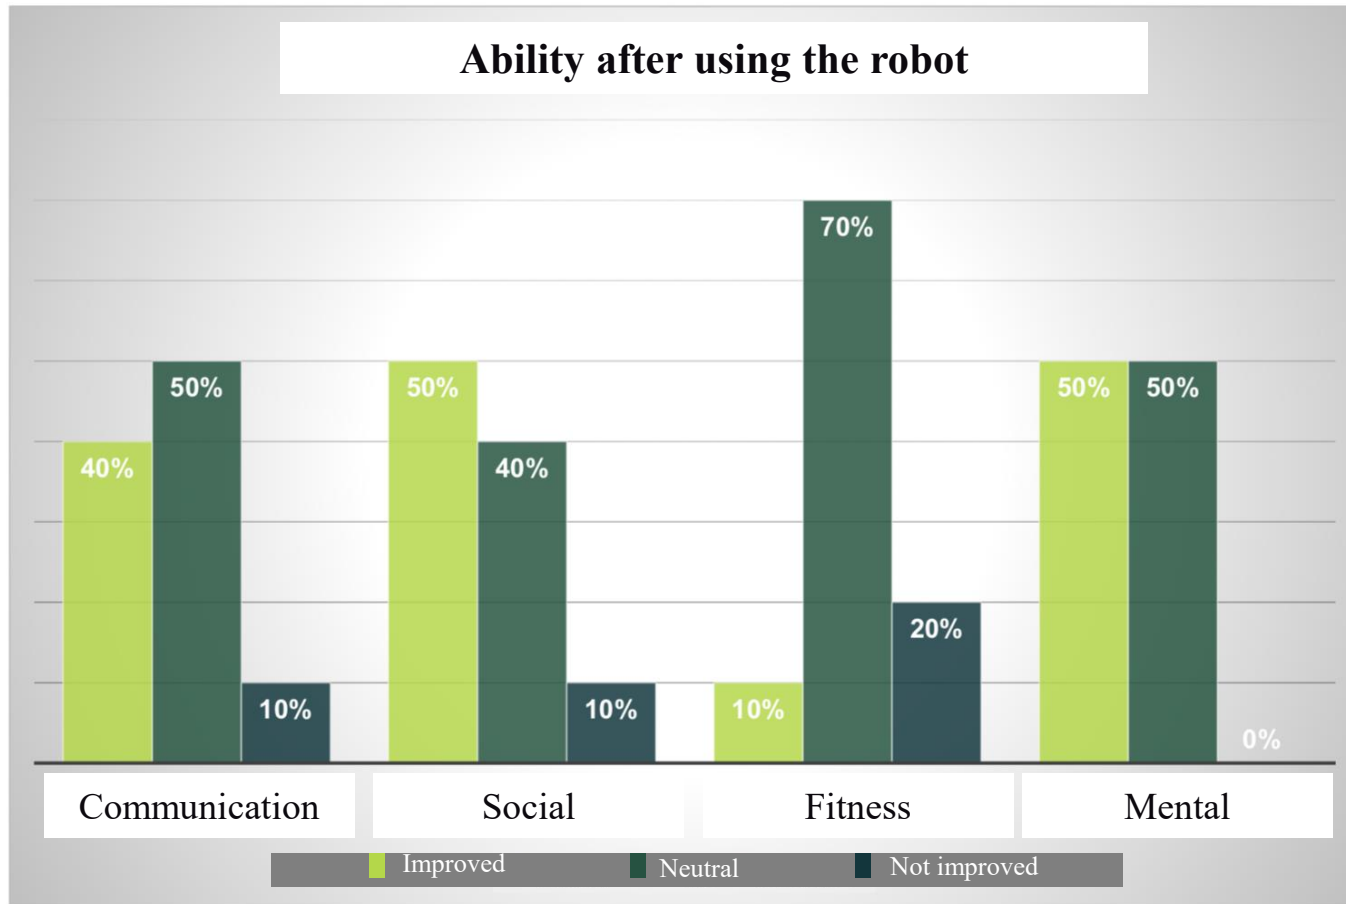

**Purpose:** Examine the effectiveness of NEC Social Robot's mental & social support for elderly

**Target:** 10 elder people (2 elderly with Dementia)

**Period:** June – August 2018 (2 months)

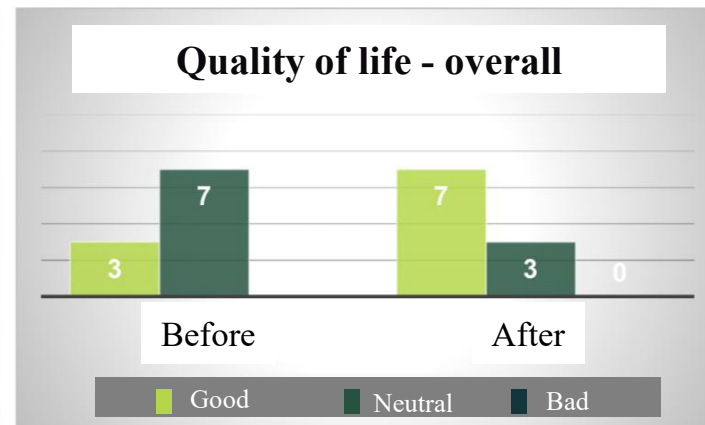

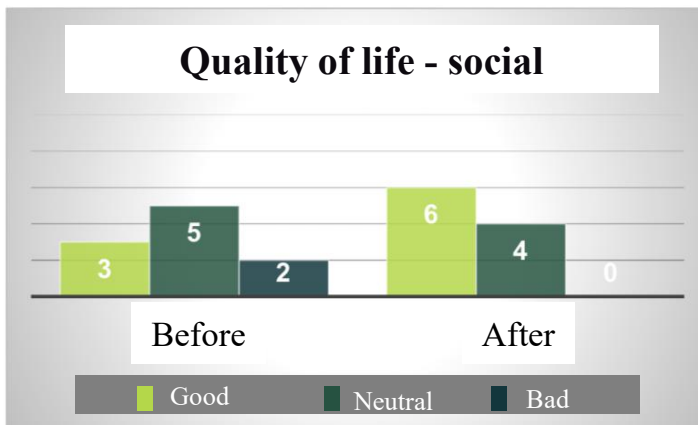

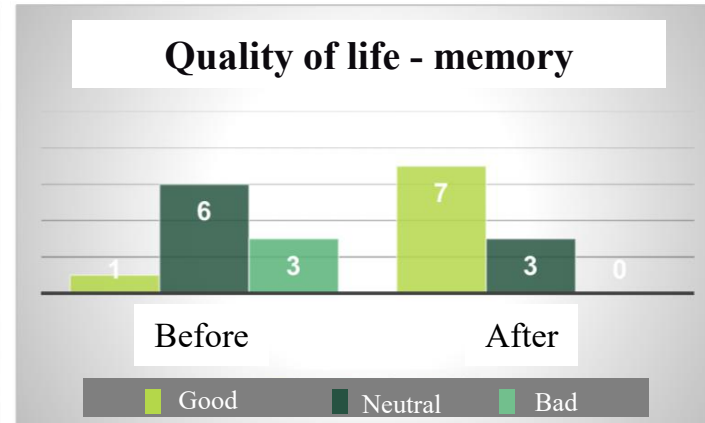

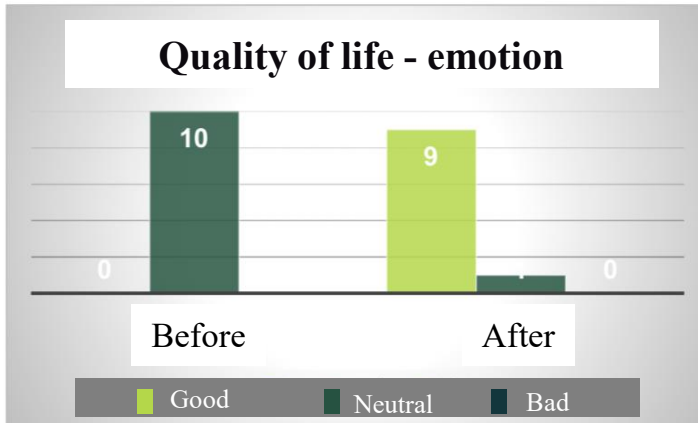

# Case Study – Findings (I)

**NEC Social Robot can enhance elderly's ability in various aspects**

# Case Study – Findings (II)

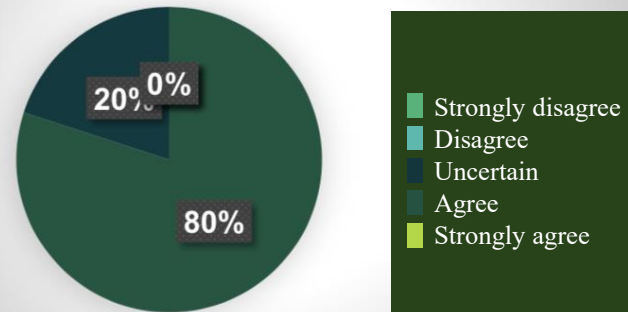

**NEC Social Robot is capable of improving quality of life of the elderly, In terms of **emotion, memory & social factors****

# Case Study – Findings (III)

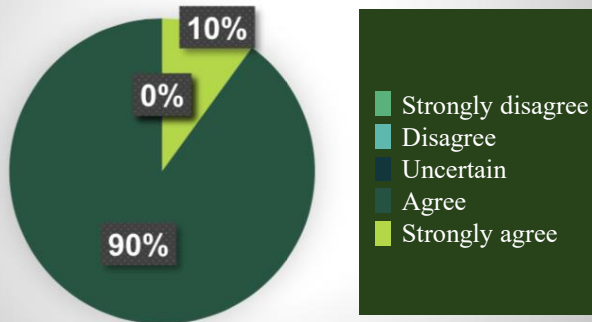

“NEC Social Robot makes me feel better”

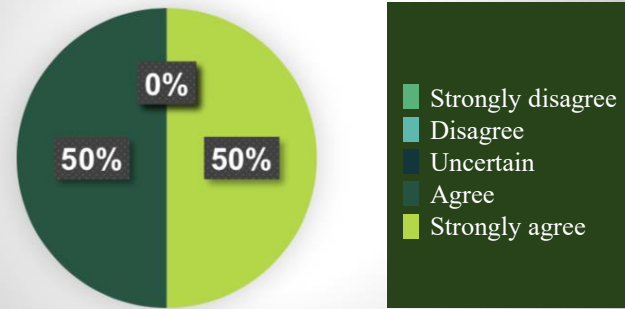

“NEC Social Robot reminds me of the good memory”

“I like to touch NEC Social Robot”

“I hope NEC Social Robot can come back”

**NEC Social Robot brings positive impact on the users**  
**ALL of the users would like to use NEC Social Robot continuously**

# NEC Social Robot

## - Training for **Children with Autism**

# Children with Autism in the Global

## Key facts

- According to World Health Organization, **1 in 160** children in average has ASD in the globe
- Over the past 50 years, studies show that the prevalence of ASD is **increasing globally**
- **Hong Kong** has the **highest prevalence of ASD** among children in selected countries as of 2020

Prevalence of autism spectrum disorder among children in select countries worldwide as of 2020  
(per 10,000 children)

# NEC Social Robot - Training for Children with Autism

NECHK and the Chinese University of Hong Kong (CUHK) join hands by signing a memorandum of understanding (MOU) in MAY 2018 to promote CUHK's Robot-based Intervention Programme named "Robot for Autism Behavioral Intervention" (RABI) for children with autism spectrum disorders (ASD) in Hong Kong.

Ms. Elsa Wong (right), Managing Director of NECHK, and Prof. Alvin Leung Seung Ming (middle), Dean of Education at CUHK sign a MOU on robot for the programme of "Robot for Autism Behavioral Intervention" (RABI)

 <p>自訂程式</p>		 <p>關閉</p>	

# NEC Social Robot - RABI Programme for Children with Autism

## Overview:

- Using NEC Social Robots to teach social, communication and self-care skills to 3 to 18 year-old autistic children

## Positive Outcomes:

- Improved **Social Skills** such as concentration, eye contact and mental interpretation for autistic children
- Improved **appropriate behaviors** in different situations
- Enhanced **Self-care skills**

## NEC Social Robot:

- Understands and responds to **Cantonese** Instructions with facial expression
- Record & analyze child's speech & body language
- Give instant feedbacks for improving skills
- Teach communicate & social skills
- Practice with children
- User-friendly: computer for carrying out programs

# Parents' Impressions for RABI Programme (I)

“The attention and participation of the children improved after modification of the physical setting. Appreciated that!”

“My son really learned the social communication skills after studied the RABI programme. With a little hints, he remembered to say hello, have eye contact with people, and speaking in turns, although his social skills still need to improve. I am very thankful to the CUHK RABI Team for creating the Robot Training Programme for autistic children. It really **help children to learn practical social communication skills**. Parents can also learn how to train and communicate with children sustainably.”

“I am very grateful for teaching children by robots. Children like to study the courses and love robots very much. My son also said that he **likes listening to the robots**, and wants to eat robotic meals (balanced diet), he is now in love with robots!”

“Children like robots very much, especially flushed face when talking, they are very cute.”

# Parents' Impressions for RABI Programme (II)

“Skill Improvement of my daughter after attended the RABI Programme:

- 1) Take the initiative to pick up
- 2) More words when expressing
- 3) Argue with brother when playing toys, know how to keep calm to deal with it (or quicker to calm down), and try to propose a solution.”

“My son likes robots very much, he often hanging on the lips, when he did some incorrect behavior, I reminded him about the teaching skills that taught by robots in the class. Also, I always tell him that “If you do well, I will praise you, likes robots praised you.” He knows that good behavior will be praised by parents and others, so he **try to change his incorrect behavior.**”

“Thank you for letting children to participate the RABI programme. When my son take the class, he will try to do the skills that taught by robots at home, it helps him to change and improve his bad habits. It's amazing! **It's a meaningful and helpful programme for children.**”

 **Orchestrating** a brighter world
